PASCAL CHIDERA NDIFE

JUNIOR DATA ANALYST

Email: ndifepascal@gmail.com | **Phone:** +234 901 165 4019
Location: Nkwelle Ezunaka, Anambra State, Nigeria
LinkedIn: linkedin.com/in/pascal-ndife-755336426 | **GitHub:** github.com/leodera
Portfolio: leodera.github.io

PROFESSIONAL SUMMARY

Junior Data Analyst with a Bachelor of Engineering in Mechanical Engineering and practical experience in operational record-keeping, spreadsheet management, and manufacturing maintenance.

Hands-on experience using Python, SQL, Excel, and Google Sheets for data cleaning, analysis, and business problem-solving through independent projects. Familiar with exploratory data analysis, revenue and profitability analysis, customer segmentation, cohort analysis, customer retention, and RFM analysis.

Interested in Data Analyst and Junior Data Analyst opportunities, including remote positions.

TECHNICAL SKILLS

Programming and Data Analysis: Python, SQL, Pandas, NumPy

Spreadsheets: Microsoft Excel, Google Sheets

Business Intelligence and Visualization: Power BI, Tableau, Plotly, Streamlit, Dash

Development Tools: Git, GitHub, Visual Studio Code

Analytical Techniques: Exploratory Data Analysis (EDA), Data Cleaning, Customer Segmentation, Cohort Analysis, Cohort Retention Analysis, Customer Churn Analysis, RFM Analysis, Pareto Analysis, ABC Analysis, Revenue and Profitability Analysis

PROFESSIONAL EXPERIENCE

Okaddy Global Services Limited **July 2026 – Present**
Data Entry Specialist

- Record daily sand sales and trips completed by trucks and boats.
- Maintain operational records using Microsoft Excel and Google Sheets.
- Introduced spreadsheet-based record-keeping to replace the company's previous manual book-recording process.
- Enter and organise daily operational information for record-keeping purposes.

Emos Best Industries Ltd **February 2026 – June 2026**
Maintenance Personnel

- Supported maintenance activities involving lotion mixing machines, lotion filling machines, and air compressors.
- Lubricated moving machine components as part of equipment maintenance.
- Assisted with machinery troubleshooting under the supervision of experienced maintenance personnel.

Emos Best Industries Ltd **June 2024 – November 2024**
Industrial Training Student

- Completed six months of industrial training in a manufacturing environment.
- Gained practical exposure to industrial machinery and maintenance operations.

DATA ANALYTICS PROJECTS

1. NYC Airbnb Data Cleaning and Market Analysis

Tools: Python, Pandas, NumPy, Google Sheets

- Cleaned an Airbnb dataset containing 102,599 records, reducing it to 102,058 records after removing 541 exact duplicates.
- Documented 25 data-cleaning fixes.
- Conducted 13 automated data-quality checks, all of which passed.

- Produced supporting documentation, including a cleaning log and missing-values report.
- Prepared the dataset for further analysis.

Repository: github.com/leodera/airbnb-nyc-data-cleaning

2. Olist Revenue Concentration and Payment Risk Analysis

Tools: SQL, Python, Pandas, Plotly, Dash, Power BI

- Analysed revenue distribution across product categories and customer states.
- Found that three states accounted for approximately 63.4% of revenue.
- Identified that 18 of 74 product categories generated approximately 81.2% of revenue.
- Examined payment methods and installment behaviour across geographic markets.
- Developed interactive dashboards to communicate findings.
- Presented business recommendations around revenue concentration, geographic growth opportunities, and payment behaviour.

Live Dashboard: olist-revenue-risk-audit.onrender.com

3. Superstore Commercial Audit

Tools: Python, Pandas, Google Sheets, Power BI

- Conducted sales and profitability analysis using a Superstore dataset.
- Examined performance across product categories and sub-categories.
- Analysed profit and discount patterns to identify areas of weak profitability.
- Used Power BI to present business findings through a dashboard.
